ABOUT ME

Full-Stack Developer specializing in React 19 and AI-integrated web applications. Proven ability to build performant, type-safe interfaces and scalable frontend architectures with a focus on user-centric design.

TECHNICAL SKILLS

Languages : TypeScript, JavaScript, C++, SQL, Python

Frontend : React, Tailwind CSS

Backend : Node.js, FastAPI, Express

Databases : MySQL, MongoDB

Tools : Docker, Git, Postman, Vercel, Render

EDUCATION

Bachelor of Technology in Computer Science | Jamia Hamdard University (2023-2027)

PROJECTS

• **Ai-Resume-Analyzer | AI-Driven Career Tool**

- **Tech Stack:** React 19, TypeScript, Puter.js, pdfjs-dist, Tailwind CSS.
- Engineered an AI-powered analyzer using **React 19** and **Puter.js** to provide real-time feedback on uploaded PDF resumes.
- Implemented precise text extraction logic using **pdfjs-dist**, ensuring **99% accuracy** in content processing.
- Developed a seamless drag-and-drop interface with **React-Dropzone** and managed global state using **Zustand** for high-performance UI updates.
- **Links:** [Live Demo](#) | [GitHub](#)

• **kidsportal | Interactive Learning Platform**

- **Tech Stack:** React, Vite, Tailwind CSS, Python, FastAPI, MySQL, JWT.
- Engineered an end-to-end secure authentication system, developing the backend logic with **FastAPI** and integrating **JWT** and **Google OAuth** into the React frontend.
- Designed the relational **MySQL** database schema to efficiently manage user profiles, authentication states, and dynamic video content for personalized learning feeds.
- Built a "Cognitive Game Engine" and a personalized dashboard, leveraging complex **React state** (useState, useEffect) to handle real-time logic, "Watch History," and saved media without page reloads.

• **Real Estate Platform | Property Management System**

- **Tech Stack:** React.js, Tailwind CSS, React Router v7.
- Architected a fully **responsive property listing** platform with dynamic filtering and modern UI components.
- Optimized routing and navigation using **React Router v7**, ensuring **sub-100ms** page transitions.
- Designed a scalable component library with **Tailwind CSS**, reducing CSS bundle size and improving maintainability.
